## Vocational training placement **Media technologist for print** (m/f)

Interesting and challenging.

*Anton Debatin GmbH specialises in innovative, tamper-evident packaging solutions for transport, mail delivery and logistics. Founded in 1923, this medium sized company is based in Bruchsal. With locations in France and the United Kingdom, as well as international license partners, the company today is a global leader in the industry. We focus on being responsive to our customers, producing quality products and developing path-breaking innovations. We also focus in equal measure on protecting the environment, treating natural resources with care and respect, and creating a healthy work-life balance for our employees. Because we're very aware that how we act today has an impact on the future – which is why we need to start now to consider future generations. We attach great importance to offering young people vocational training opportunities, because we want to give our trainees the best possible start to their professional career.*

### Vocational training placement

Flexo-printing has advanced rapidly over the last few years, both with regard to quality and popularity. As a result, it has been necessary to develop a specialised vocational training course which focuses on this printing technology.

Flexo-printing is now fully recognised as a printing method, and, at an annual rate of 7-9%, is growing faster than any other method. Flexo-printing offers state-of-the-art technology for existing markets and new markets, and a highly diverse course of vocational training which is remunerated accordingly. The course, which covers a wide range of areas from mechanics to electronic engineering, also offers trainees various opportunities for career advancement.

The vocational training course for media technologists is a dual system, i.e., trainees alternate between the workplace and college (Carl-Hofer School, Karlsruhe). It lasts for 3 years.

### Our expectations

- Interest in technology
- Dexterity
- The ability to work accurately and scrupulously
- Ability to distinguish fine nuances of colour
- Good observation skills

### Your tasks

- To mount the printing plates onto rollers
- Setup and operation of printing presses
- Mixing colours
- Printing plastics
- Monitoring printing
- Servicing printing presses
- Conducting quality controls

### Career advancement

As a media technologist, you can advance your career in numerous directions. In order to train as an industrial foreman/forewoman for digital media & print media, or as a media specialist, or to become a qualified engineer or complete a BA in engineering for flexo-printing, you need to have 2 years of professional experience in this field of work.

**You're interested** to know more, and would like to embark on an exciting vocational training course with excellent opportunities for career advancement? If so, we look forward to receiving your application!
