

A solid start to your career with vocational training at **Debatin**.

DEBATIN[®]
SAFE. PERFECT. PACKED.

Vocational training placement **Packaging technologist** (m/f)

Diverse and future-proof.

Anton Debatin GmbH specialises in innovative, tamper-evident packaging solutions for transport, mail delivery and logistics. Founded in 1923, this medium sized company is based in Bruchsal. With locations in France and the United Kingdom, as well as international license partners, the company today is a global leader in the industry. We focus on being responsive to our customers, producing quality products and developing path-breaking innovations. We also focus in equal measure on protecting the environment, treating natural resources with care and respect, and creating a healthy work-life balance for our employees. Because we're very aware that how we act today has an impact on the future – which is why we need to start now to consider future generations. We attach great importance to offering young people vocational training opportunities, because we want to give our trainees the best possible start to their professional career.

Vocational training placement

Packaging technologist (m/f) is a recognised course of vocational training in accordance with the BBiG (Vocational Training Act). Packaging technologists are generally deployed in industrial environments, in companies which specialise in packaging, plastics and pre-packaging. Here, most packaging technologists work in production buildings.

The vocational training course for packaging technologists is a dual system, i.e., trainees alternate between the workplace and college (Johannes-Gutenberg School, Stuttgart). It lasts for three years, but may be shortened to 2 1/2 years if the trainee has the necessary prior education and receives good grades. As this school is located at some distance to our site in Bruchsal, the company pays travel costs to and from Stuttgart.

Our expectations

- Hauptschulabschluss (basic certificate of secondary education with qualification)
- Dexterity
- Interest in technologys
- Good spatial perception
- Good reflexes
- Team spirit
- Motivation, ability to take the initiative

Your tasks

- Setting up packaging machines
- Controlling and monitoring packaging machine processes
- Repairing and servicing packaging machines
- Quality controls of finished goods using modern laboratory equipment
- Manufacturing packaging materials using packaging machines

Career advancement

As a packaging technologist, you can advance your career in numerous directions. In order to study engineering at university level or become a qualified engineer and industrial foreman/forewoman, you will need 2 years of professional experience in this field of work.

You're interested to know more, and would like to embark on an exciting vocational training course with excellent opportunities for career advancement? If so, we look forward to receiving your application!
