

DEBASAFE™ **automotive**

*Packaging solutions designed specially
for logistics in the automotive industry*

DEBATIN[®]
SAFE. PERFECT. PACKED.

We take the environment seriously!

For this reason, we use only environmentally-friendly polyethylene in the production of our DEBASAFE™ automotive products. Polyethylene can be recycled, does not contaminate groundwater, and does not emit poisonous gases when burned.

DEBASAFE™ automotive Only original spare parts are guaranteed to be fully functional and safe. Protect yourself and your customers from counterfeits – pack your original spare parts in DEBASAFE™ **automotive** tamper-evident plastic mailing bags to guarantee safety and authenticity. Protect original spare parts by storing them in security bags with tamper-evident sealing strips to stop them from “disappearing”. Small parts can be enclosed in grip seal bags.

Overview of features:

- extremely sturdy double-shrink seal
- pouch of bag made of either transparent or opaque LDPE film, standard versions: 70 or 85 µm; other strengths available upon request
- consecutive numbering, code 39, code 128 interleaved, code 2/5 interleaved or customer-specific coding possible
- available with handle upon request
- up to 6 colour flexo-printing into the welded seam area for recognising attempts at tampering, or for customised designs
- bag sizes range from 100x100 mm (+ flap) to max. 700x800 mm
- minimum order for standard versions: 500 pcs, minimum order for customised products: 10,000 pcs
- solutions for disposal of bags available upon request

DEBATAPE **plus** tamper-evident sealed closure

Won't give substandard counterfeits a chance. Any attempt at tampering is displayed. Mechanical, thermal or chemical tampering - DEBASAFE™ **automotive** offers reliable protection.
