

UNIPACK™ **export**

The heavy-duty document pouch. (Patent pending)

DEBATIN[®]
SAFE. PERFECT. PACKED.

We take the environment seriously!

For this reason, we use only environmentally-friendly polythene in the production of our UNIPACK™ products. Polythene can be recycled, does not contaminate ground-water, and does not emit poisonous gases when burned.

UNIPACK™ export is the ideal self-adhesive document pouch for shipping papers, protecting its contents reliably even in the toughest of conditions. As well as a self-adhesive back, UNIPACK™ **export** pouches also feature an additional broad strip that enables them to be further secured using a staple gun. This means that UNIPACK™ **export** pouches can be attached securely even to wooden freight crates. The separate document pocket ensures your shipping papers don't get "nailed down". Thanks to the resealable closure, papers can be easily removed and replaced by customs etc.

Overview of features:

- Sturdy polythene film offers reliable protection for freight papers
- Minimum order quantity for production and delivery: 25,000 pcs

- Easy to handle
- UNIPACK™ **export** is the low-cost alternative to all conventional methods. Freight documents can be directly attached to the wooden crates by using the red-shaded surface

EXPORT

Red & white stapling zone for more secure attachment
