

TEST REPORT
on security against manipulation of safebags

BAM reference 5.3/10625/14

Customer Anton Debatin GmbH
Vichystraße 6
D-76646 Bruchsal

Reference Friedbert Moch

Order date 2014-06-25 **Receipt of order** 2014-06-26

Object of the test report

1. Development of a routine for testing and evaluation of security against manipulation of safebags for transport of hard cash based on the specifications of the Deutsche Bundesbank.
2. Testing and evaluation of the newly developed safebag "DEBATAPE high plus", based on the routine of point 1 and evaluation of the quality control during production.

Results

Based on the tests of detectability and verifiability of manipulations according to the specifications of the Deutsche Bundesbank as well as evaluation of quality control measurement during production it is hereby confirmed that the safebag "DEBATAPE high plus" has a

"high security against manipulation"
