

DEBASAFE® RFID

Security bags with transmitter chip.
Miniature chip for maximum security.

DEBATIN
SAFE. PERFECT. PACKED.

► **DEBASAFE® RFID** (Radio Frequency Identification) – the ideal addition to our range of globally tried and trusted CVIT security bags. Added to the tamper-evident sealing strip and numerous other security features, the inclusion of an RFID tag caters to an even wider range of applications. In contrast to conventional barcodes, individual bags which have been fitted with an RFID tag can include a large amount of information which can be read in transit by the appropriate device. DEBASAFE® RFID thus becomes a bag with a memory.

Meets all needs.

DEBATIN. Safe. Perfect. Packed.
