

DEBASEAL® *bag seals*
High-security seals.
Scaled security.

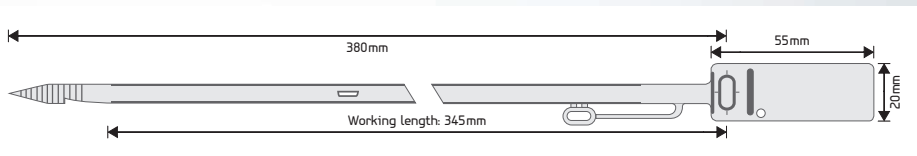

DEBATIN
SAFE. PERFECT. PACKED.

► **DEBASEAL**® *bag seals* *These high-security seals feature a metal insert which is welded into the closure cavity to protect against tampering. The centimetre scale reliably displays any tampering with the stem of the seal.*

Overview of features:

- For sealing all types of bags or sacks, with or without rings (money bags, postbags, courier bags, sacks for transporting security bags, CVIT bags, bags for forensic evidence)
- Also suitable for air freight, fixed-wheel containers and other applications where heavy-duty seals are needed.
- The integrated label holder makes it easy to attach a label to the security seal
- Interlocking teeth at the top of the rod prevent the closed seal from being pulled off the bag
- Smooth, flat stem for optimum handling
- Printing method: laser embossing for a high level of legibility and resistance to wear
