

DEBAMED® D-PAK
*Kit for transporting samples of
biological substances.*

DEBATIN
SAFE. PERFECT. PACKED.

L.E.S.S. FRANCE

► **DEBAMED® D-PAK** is a kit consisting of secondary packaging (a bag) and outer packaging (a box). It is used for transporting category B (UN3373) samples of biological substances in compliance with the international and European Guidance on regulations for the transport of infectious substances (ADR - IATA - WHO). The D-Pak is suitable for sending samples at room temperature or for cold chain deliveries (chilled or frozen).

Product information

Description

| | |
|--------------------------------|---|
| <p>Product characteristics</p> | <ul style="list-style-type: none"> • Suitable for sending samples at room temperature, or for cold chain deliveries (chilled or frozen) thanks to a 20 mm isothermal polystyrene layer. • No reverse logistics • Outer packaging consists of a box with integrated closure system • Flexible secondary packaging with integrated absorber: waterproof bag is capable of withstanding an internal pressure of 95kPa • Additional waterproof bag which prevents fluids from leaking during transport if primary containers are not watertight (e. g., petri dishes etc.) • Air-bubble bag with adhesive closure for guaranteed shock resistance • Complies with packaging instruction P650 for class 6.2 |
